

A return solution, at your disposal.

Proper disposal of pharmaceuticals is essential in the protection of the environment. MedFlats® is the first all-inclusive system to address environmental responsibility while meeting the pharmaceutical return and disposal needs of a variety of healthcare facilities.

Improper disposal of pharmaceuticals can lead to pollution and illegal diversion of controlled substances, which have catastrophic effects on both our environment and community. By using MedFlats®, you will have peace of mind knowing that pharmaceutical products have been

properly documented, returned or destroyed.

Implementing MedFlats® in your facility is easy and requires no training or special equipment. Simply order the flat size that best fits your needs, fill it with the pharmaceutical products that require return/disposal, and send it to our facility (shipping is pre-paid and included in the cost of your flat).

Take pride in the fact that you are now part of an elite group of environmentally responsible healthcare professionals.
